

I have been a licensed amateur radio operator for over thirty years and BPL troubles me deeply. Please review the well founded Comment submitted by The American Radio Relay League concerning Docket ET 03-104. I conclude the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket at this time. Further research and innovations in BPL will be needed to avoid the risk this innovative technology can bring so that it will not cause harmful interference to services licensed to operate in the 2 MHz - 80 MHz frequency range. Furthermore, approval of ET 03-104 would also violate the existing FCC rules on non-interference and would be contrary to the best interest of the public.
